DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a medicament for the treatment or prevention of diseases due to an infection by *Neisseria meningitidis*, characterized in that it comprises glycoconjugates and/or lipooligosaccharides and/or bacteria and/or antibodies.

Additional Election Requirement

Each Group detailed above reads on patentably distinct compositions. Each composition is patentably distinct because they comprise genes with differing genus, species, antibodies, and sources of antibodies and a further restriction is applied to each Group. (See MPEP 803.04).

Should Applicant elect a combination of glycoconjugates, lipooligosaccharides, bacteria and/or antibodies, Applicant must further elect a specific antibody; specify whether it is to be polyclonal or monoclonal, and the source of the antibody.

Applicant must further elect a specific bacterium, species, and the antigen it cross-reacts with.

Applicant is advised that examination will be restricted to only the elected sequence and/or disease and should not be construed as a species election.

Art Unit: 1645

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lakia J. Tongue whose telephone number is 571-272-2921. The examiner can normally be reached on Monday-Friday 8-5:30.
